Bachelor of Science in Software Engineering | Dire Dawa University 2021 – Present

Relevant Coursework: Data Structures & Algorithms | Object-Oriented Programming | Web Technologies | Software Design Patterns | Database Systems

PROJECTS

Ethiopian Coffee Export Business Website | HTML5 | CSS3 | JavaScript | Bootstrap 2024

- Designed and developed a full, responsive multi-page website for an Ethiopian coffee export business, showcasing products, sourcing regions, and export services.
- Implemented a clean, culturally inspired UI with smooth navigation, product galleries, and a contact/inquiry form — improving brand credibility and online reach.
- Optimized for mobile-first performance and cross-browser compatibility across all major browsers.

- Built a professional personal portfolio website to showcase skills, projects, and technical profile to potential employers and clients.
- Incorporated animated hero section, skills showcase, project gallery, and a responsive contact form with form validation.
- Deployed publicly and linked to GitHub profile, increasing online professional visibility.

Frontend UI Component Library | HTML5 | CSS3 |
JavaScript | Bootstrap

2023 – 2024

- Developed a collection of reusable, fully responsive UI components including navigation bars, hero banners, cards, modals, and form layouts.
- Leveraged Bootstrap's grid system and custom CSS overrides to ensure pixel-perfect rendering across screen sizes.
- Used across multiple web projects to accelerate development speed and maintain consistent design language.
